

PREVCO "Standard Stock" Aluminum Housings

Housings listed below are those that PREVCO try to keep in stock to satisfy the "immediate" needs of our customers. All designs listed can be easily modified to meet depth and dimensional requirements. Although the diameter of each cannot be changed, the length can be custom cut without too much impact on price or lead times. Depths in **RED** below are derated depths determined by length and diameter. Call Prevco to discuss your specific operational requirements.

Model Numbers Prefix (Complete model no's will include the number of connectors on each endcap)	Depth Rating	Inside Dimensions				Outside Dimensions						Approximate Weight			
		Packaging Diameter		Packaging Length		Nominal Tube OD		Nominal Flange OD		Outside Overall length		In Air		In Water	
		meters	inches	mm	inches	mm	inches	mm	inches	mm	inches	mm	Lbs	Kg	Lbs
